SUMMARY

- Motivated and detail-oriented student seeking an opportunity to apply technical skills and gain real-world experience in software development. Eager to contribute strong programming, problem-solving, and teamwork abilities to a dynamic tech team.

EDUCATION

St. Joseph's Institute of Technology

B.Tech Information Technology (2024-2028)

Chennai, India

CGPA : 8.4/10

TECHNICAL SKILLS

Languages: Python, Java, C, SQL (MYSQL), JavaScript, HTML/CSS

Areas of Interest: Web Development, Network and infrastructure, Cloud Computing

Developer Tools & Technologies: Git, Docker, VS Code, Visual Studio, Excel, MongoDB Database, Antigravity, Vercel

Libraries: pandas, NumPy, Matplotlib

Soft Skills: Communication, Team Collaboration, problem Solving, Adaptability, Quick Learner

EXPERIENCE

Web Development Internship

June 2026

Pinnacle Labs (Online)

- Gained comprehensive hands-on experience in basic and modern web development workflows.
- Designed and built responsive webpages and interactive user interfaces using modern frontend tools.
- Applied industry-standard layout principles ensuring cross-browser compatibility and optimized mobile rendering.

Artificial Intelligence Internship

Dec 2025

Code Alpha (online)

- Acquired structured hands-on experience in foundational AI and Machine Learning principles.
- Built and tested functional web-based applications integrating intelligent logic with frontend UI components.
- Explored practical problem-solving using intelligent algorithms, rapid prototyping, and algorithmic workflows.

PROJECTS

ShareBite-Food Donation & Tracking System

Tech Stack : Python, Flask, MongoDB, PyMongo, HTML5, CSS3, JavaScript

[Github](#)

- Built a full-stack platform connecting surplus food donors with orphanages and shelters to reduce food waste.
- Expanded Flask REST APIs and MongoDB schemas for food logging, verification, and live tracking.

Responsive Personal Portfolio Website

Tech Stack: HTML5, CSS3, JavaScript, Git, GitHub

[Github](#)

- Created and built a responsive personal portfolio site with dark/light themes and glassmorphism UI.
- Added interactive features like a live terminal simulator and animated particle background using vanilla JavaScript.

PredictX: AI-Based Industrial Failure Prediction & Predictive Maintenance System

Tech Stack: Python, FastAPI, MongoDB, scikit-learn, XGBoost, SHAP, React

[Github](#)

- Built an ML-based system to predict industrial machine failure risk using the dataset.
- Developed a FastAPI backend with MongoDB and a React dashboard for real-time risk visualization and SHAP-based explainability.

CERTIFICATIONS & ACHIEVEMENTS

- 30 Days AWS cloud Challenge [linkedin](#)
- 1000+ problem solved in Skillrack platform [Skillrack](#)
- Certifications in NPTEL, AWS courses, CISCO [Credly](#)
